Dear Mike,

On behalf of ESI's Education Staff, I would like to extend our thanks for hosting an excellent continuing education class and for your time and effort in the instructional process. As educators we know how much goes into the behind-the-scenes work prior to the class date while simultaneously balancing other professional duties. Your knowledge and expertise was very beneficial to those in attendance. We received terrific feedback such as the following: "This is one of the best continuing education classes I have attended. Besides seeing the actual on the ground results of LEED and LID techniques, the presentation was engaging and provided cut-to-the chase information and answers to our questions. I hope this class will be not only repeated as the technology proves itself over time, but is also included in the ESI basic training curriculum. Well done!"

Again, thank you for making this contribution to the engineering community of Northern Virginia. I hope to work with you again in the future.

Sincerely,

Becky Newlen  
ESI Education Specialist
